**Medical Experience**

After graduating from St George's Hospital Medical School at the University of London, and gaining a wide and diversified experience in all aspects of obstetrics and gynecology at prestigious hospitals and medical schools in the UK, I obtained additional higher surgical training in laparoscopic and hysteroscopic surgery leading to accreditation by the royal college of obstetricians and gynecologists, and in my last post I held the position of lecturer at the Imperial college of Medicine.

After moving back to Lebanon I established a busy private clinic where evidence based medicine was practiced and headed the Obstetrics and Gynecology department at the Lebanese Canadian Hospital. I was appointed as the Head of Obstetrics and Gynecology at Clemenceau Medical Center- Affiliated with Johns Hopkins International since its inception in 2005.

My special interests include:

- cosmetic and laser vaginal rejuvenation gynecologic surgery
- minimal access surgery
- infertility treatment and assisted conception
