Medical Experience

After obtaining my M.D. in 1981, I completed one year of specialty in Internal Medicine at A.U.B-MC, I found myself attracted to Laboratory Medicine where I joined residency at AUB from 1983-1986. Afterwards, I continued my fellowship in transfusion Medicine and Blood Banking at New York Blood Center from 1986-1987.

My professional experience started at Fouad Khoury Hospital where I commissioned and operated laboratory department from 1987 till 2005.

I have moved to Clemenceau Medical Center-affiliated with Johns Hopkins International-to commission and run the Laboratory Medicine Department from 2005 until present.
